

Participate in an Autism CRC research study looking into Middle Years Behaviour Support

Dear Student,

My name is Beth Saggers, I am an Associate Professor in the Faculty of Education at Queensland University of Technology (QUT) and a researcher with the national Autism Cooperative Research Centre (CRC). For more information about the Autism CRC visit www.autismcrc.com.au.

This project is being done as part of a university study.

This project is looking at how students feel about school and what they think would help make school more enjoyable.

The team is looking for students aged 9-16 years in Steiner schools to help out.

Your support is voluntary. This means it is YOUR choice whether you take part in this study. You can choose to stop participating at any time and nothing bad will happen. No one will be upset, including your parents or your teachers.

You will be asked to fill in a survey. This will take about half an hour. Questions will be about what you think of your school and how you feel there.

The link to the survey is: <https://survey.qut.edu.au/f/193174/1536/>

Your parents and teachers (if you are currently attending school) will also be asked to fill in a short questionnaire about how you are going at school.

If you need more information about the study and on how to participate, please read the attached recruitment flyer.

If you have any further questions, please contact me via email mybsp-research@qut.edu.au or phone 07 3138 9615.

Thank you for your time and help.

A handwritten signature in cursive script that reads "Beth Saggers". The signature is written in a light blue-grey ink on a white background with a subtle dotted texture.
